PAPER MADE FOR LIFE

FELIX SCHOELLER

PAPER MADE FOR LIFE

By harnessing the power of paper, we at Felix Schoeller enable our customers and partners to deliver solutions that make life better for people and the planet. We do so by providing established paper solutions, by enhancing the use of paper in new applications, and by substituting limited resources through a renewable raw material, paper.

FOR ALL YOUR NEEDS

Felix Schoeller's portfolio offers you a wide selection of high-quality media for all digital printing technologies. In addition to the pure products, we offer you competent contacts worldwide and solutions for individual product developments.

Find out how we can help you.

OUR EXPERTISE FOR ALL YOUR NEEDS

Paper making

Speciality papers based on selected raw materials are modularly adaptable to your requirements.

Paper refining

Functional coatings are applied to give the surface haptics, absorbency, adhesion, protection, or printability properties.

Converting

All formats, roll configurations, packaging, and individual labels are possible.

Service

Our experts provide solutions on all aspects of new product development, applications, marketing, distribution, and logistics.

OUR PROMISE

Sustainable product quality: we don't just talk about it, we practice it.

CERTIFICATES FORM FELIX SCHOELLER

Management system for quality, environment and occupational safety
ISO 9001, 14001 and 45001

Our end-to-end management system meets all quality, environmental and occupational safety requirements of ISO 9001, 14001 and 45001.

Corporate social responsibility
Ecovadis

Ecovadis evaluates the corporate social responsibility of companies. With the "Gold" seal, Felix Schoeller is one of the leading companies in its sector.

PRODUCT CERTIFICATES

We subject our products to regular tests to ensure they work best on your presses. External test results and certificates are also available depending on the product, application, or printing technology.

Certified for
HP Latex Inks

Trouble-free use
HP Latex certified and
HP Indigo certified

The HP Media Certification Program enables the evaluation of compatibility and performance of substrates with HP Latex printers and with HP Indigo presses.

HP Indigo
Certified Media

The HP Latex certified logo confirms perfect compatibility. The HP Indigo certified logo confirms perfect compatibility and performance.

Lasting for 200+ years
Light resistance

The E-PHOTO® products have undergone extensive quality control tests. According to the renowned institute Wilhelm Research results, we can achieve a light resistance of over 200 years when our products are printed with original HP Indigo inks.

Display permanence
Permanence

The independent testing institute Wilhelm Research conducts testing on media according to various criteria to determine the stability of photo media. The combination of our E-PHOTO® media with HP Indigo inks is classified as a durable product.

Fogra certification
for proof

Fogra certification for proof: with this certification, manufacturers prove that their proof substrate (proof paper) conforms to ISO 12647-7 and is suitable for test print production with regard to desired reference printing conditions.

Sustainable forestry
FSC®

Felix Schoeller is certified with all its paper producing operations in accordance with FSC® (Forest Stewardship Council®). The pulp used for our paper comes from sustainable and socially beneficial forest management – and this applies to our entire value chain.

TABLE OF CONTENTS

Sorted by product group (page 6 – 15):

- Photo papers
- Dry minilab Inkjet
- E-PHOTO®
- Fine art papers
- Solvent & latex papers
- Proof & prepress
- Sublimation papers
- Transfer media
- Matt & bond papers

Sorted by product category (page 16 – 21):

Paper

- Special-coated matt paper
- Special-coated rag paper
- Microporous coated rag paper
- Microporous coated dye sublimation paper
- Microporous coated thermal adhesive dye sublimation paper
- Microporous baryta-coated paper
- Microporous coated paper
- Microporous resin-coated paper
- Resin-coated paper with SLP
- Resin-coated paper with primer

Film

- Coated transparent film
- Coated paper
- Microporous coated transparent film

S-RACE® TERRA

Sublimation paper
with a recycled base

NEW

Original S-RACE®
microporous coating

- Fast
- Precise
- Efficient
- Consistent

28% less CO₂
emissions compared
to conventional
sublimation papers

Made of 65% recycled fibers
(e.g., tissue, envelopes,
and printed books)

Making dye sublimation even more sustainable.

We need to protect and use the finite resources of our Mother Earth as efficiently as possible. That is why we have developed S-RACE® TERRA – a dye sublimation paper made of 65% recycled fibers. The result is a 28% reduction in CO₂ emissions compared to conventional sublimation papers. This makes S-RACE® TERRA a sustainable solution for the textile printing industry whilst maintaining the unique properties and benefits of S-RACE® dye sublimation paper in general. Be a sustainable part of it.

FINE ART PAPERS

Professional papers for the highest expectations.

TRANSFER DT paper FOR OUR PLANET

NEW

The paper-based solution without compromise

The TRANSFER DT paper guarantees no compromises have to be made. Not in terms of our planet or your transfer business. Processes are just as stable and colors just as intense as with film solutions. At the same time, it helps reduce plastic waste and conserve finite resources by using a renewable raw material.

FORMAT EXPLANATION

Sheets

Small format

Small-format sheets are cut to the highest degree of accuracy for desktop printers. They are available in formats ranging from SRA3+ to B2 (13 x 19 to 29.5 x 20.9 inches). Small-format sheets come in wallets or boxes or can be bulk packaged. Customized packaging and labels are available on request.

Small format ream packed

Small-format sheets in ream packs are cut to the highest degree of accuracy and optimized for electrophotographic digital presses. They are available in SRA3+ to B2 (13 x 19 to 29.5 x 20.9 inches). The sheets are wrapped in barrier paper, protecting them from moisture and dirt.

Rolls

Mini roll

Mini rolls are optimized for large-format printers or plotters. They are available in widths of 43.2 to 152.4 cm (17 to 60 inches) and in various lengths on request. The core is 2 or 3 inches in diameter. A banderole or closing tape and a customized label are available on request.

Kiosk roll

Kiosk rolls are optimized for dry minilab inkjet systems. They are available in widths ranging from 10.2 to 30.5 cm (4 to 12 inches) and lengths of 65 or 101 m, wound onto a 3-inch core. Kiosk rolls are packed into sturdy multi-boxes or single boxes for parcel shipments.

Digital roll

Digital rolls are optimized for roll-fed high-speed inkjet, laser, and ElectroInk systems. They are available in widths ranging from 24 to 156 cm (9.5 to 61.4 inches), wound onto a 3 or 6-inch core with diameters optimized for the individual print system. They are packed on pallets either eye to sea or eye to sky. Digital rolls are securely fastened for truck or container shipments.

Jumbo roll

Jumbo rolls are large rolls, 43.2 to 192 cm (17 up to 75.5 inches) in width, wound onto a 3 or 6-inch core. They are optimized for individual customer needs as well as shipment requirements and are available on request. Jumbo rolls are securely fastened on pallets for truck or container shipments.

Individual formats

Don't hesitate to contact us if you need a different roll or format configuration or packaging.

READY TO MAKE A DIFFERENCE

At 12 production sites around the world we manufacture specialty paper solutions – locally available for you.
